National University of Computer and Emerging Sciences, Lahore Campus

	Course Name:	Professional Practices	Course Code:	CS 4001
	Program:	BS (Computer Science)	Semester:	Spring 2026
	Instructor:	Shehryar Raza (VF)	Section	CS (6C)
	Exam Type:	Quiz 3 - Version B	Total Marks:	20

Student Name **Roll No.**

Q1. Encircle the correct option from the given Questions: [20 marks]

A software engineer at a major firm accidentally introduces a bug that leads to a million-dollar loss for a client. The client attempts to sue the engineer personally for professional malpractice. Why would a court likely dismiss this specific charge?

A. IT workers are only liable under criminal law, not civil law.
B. The engineer is not licensed by a state or federal government body.
C. The engineer did not intend to cause financial harm.
D. The loss was financial rather than physical injury.

A mid-level manager at a tech firm receives an email from a former colleague now working at a competitor. The email contains a document labeled 'Confidential: Internal Pricing Strategy.' If the manager reads and uses this file, what is the most significant legal risk they face?

A. A fine under the Business Software Alliance (BSA) guidelines
B. Loss of professional licensing
C. Federal prosecution for trade secret misappropriation
D. A civil suit for software piracy

A US-based software company is looking to expand into a foreign market. To secure a government contract, an executive offers a 'consulting fee' to a local official. Which law makes this action a criminal offense regardless of where the payment occurs?

A. The PATRIOT Act
B. Foreign Corrupt Practices Act (FCPA)
C. Gramm-Leach-Bliley Act
D. The Economic Espionage Act

A bank accidentally leaks the Social Security numbers of thousands of customers. The bank insists they do not have to notify anyone because there is no federal law requiring it. Is this legally accurate?

A. True, but they may be bound by a patchwork of over 40 state-level notification laws.
B. False, HIPAA requires notification for all financial data breaches.
C. False, the PATRIOT Act mandates immediate 72-hour notification for all data breaches.
D. True, companies only have to notify the government, not the individual victims.

A private-sector employee is fired after their manager reads personal emails sent from a company-owned laptop. The employee sues, claiming their 4th Amendment rights were violated. What is the likely outcome?

A. The employee wins because the PATRIOT Act prevents employers from viewing private data.
B. The suit fails because the employee has a 'reasonable expectation of privacy' only in their own home.
C. The suit fails because the 4th Amendment only limits government actions, not private employers.
D. The employee wins because emails are considered 'communications privacy' under all circumstances.

An online retail site uses an algorithm to recommend products to users based on the fact that other users with similar purchase histories also bought those items. What specific type of profiling is being employed?

A. Collaborative filtering
B. Contextual commerce
C. Rules-based personalization
D. Demographic filtering

A doctor's office is transitioning to an electronic health record system. They lose several unencrypted laptops containing patient data. Which law specifically provides protections and notification rights for victims of such electronic breaches?

A. American Recovery and Reinvestment Act (ARRA)
B. Fair Credit Reporting Act (FCRA)
C. Electronic Communications Privacy Act (ECPA)
D. Children's Online Privacy Protection Act (COPPA)

A tech company executive is tasked with ensuring the firm treats consumer data ethically. He adopts a model that allows customers to review their own data and opt out of research uses. Which set of principles is he applying?

A. The reasonable professional standard
B. Safe Harbor principles
C. The universality principle
D. Fair Information Practices

An IT worker is told by their supervisor to install a single-user licensed graphics suite on all ten computers in the marketing department to save costs. If the worker complies, who bears the primary ethical and legal responsibility?

A. No one, as long as the software is used for company work.
B. Only the supervisor who gave the order.
C. The software vendor for not having better copy protection.
D. The IT worker who performed the installation.

A consumer discovers a bank account opened in their name that they did not authorize. They want to check their credit history with all major bureaus to see the full extent of the fraud. Under which law can they get this report for free once a year?

A. GLBA (Gramm-Leach-Bliley Act)
B. FCRA (Fair Credit Reporting Act) of 1970
C. USA PATRIOT Act
D. FACTA (Fair and Accurate Credit Transactions Act)

A marketing firm wants to merge its web-browsing data (captured via cookies) with a third-party database containing names and addresses. Why did public outrage force companies like DoubleClick to abandon similar plans in the past?

A. It eliminates the wall between anonymity and identity.
B. The Foreign Corrupt Practices Act prohibits data merging.
C. It is a direct violation of the 4th Amendment.
D. The data would become too expensive to maintain.

A university is approached by a textbook publisher requesting the grades and contact information of students in a specific major for a marketing campaign. Which law prevents the university from sharing these records without student consent?

A. COPPA (Children's Online Privacy Protection Act)
B. FERPA (Family Educational Rights and Privacy Act)
C. The Privacy Act of 1974
D. HIPAA (Health Insurance Portability and Accountability Act)

A US company is transferring the personal data of French citizens to a server in Virginia. The European Union objects, citing that US law allows the government too much access to that data. Which US law is the primary cause of this international friction?

A. The Electronic Communications Privacy Act (ECPA)
B. The Foreign Corrupt Practices Act (FCPA)
C. The USA PATRIOT Act
D. The Fair Credit Reporting Act (FCRA)

A large corporation hires an executive specifically to train employees on privacy practices, identify gaps in data handling, and assess company-wide risks. What is the standard title for this role?

A. Chief Information Officer (CIO)
B. Chief Privacy Officer (CPO)
C. Database Administrator (DBA)
D. Compliance Auditor

A thief installs a hidden program on a public library computer that logs every key typed by users, capturing bank passwords and social security numbers. What specific method of identity theft is this?

A. Spyware / Keystroke logging
B. Phishing
C. Data breach
D. Shoulder surfing

An IT consultant is designing a system for a client. They decide to follow a 'duty-based' ethical framework, choosing actions because they are inherently right according to logical rules, regardless of the financial outcome. What is the name of this ethical theory?

A. Virtue Ethics
B. Social Contract Theory
C. Deontological Ethics
D. Utilitarian Ethics

A customer changes the requirements of a software project halfway through development, leading to massive delays. The vendor is later sued for breach of contract. Why do such cases usually result in out-of-court settlements?

A. Breach of contract is not a legally recognized charge for IT work.
B. The Business Software Alliance (BSA) handles all such disputes automatically.
C. It is difficult to assign fault in a joint effort where both parties contribute to the failure.
D. Vendors have 'professional immunity' from contract lawsuits.

An IT professional is asked by a supplier to accept an expensive all-expenses-paid trip to a technology conference. What is the primary ethical concern in this relationship?

A. Conflict of interest
B. Breach of duty of care
C. Software piracy
D. Whistle-blowing

A company policy states that 'reasonable personal use' of computers is allowed. An employee spends four hours a day playing online games. Why might this still be an ethical violation under 'Inappropriate Use of Resources'?

A. It violates the 4th Amendment rights of other workers.
B. It drains productivity and consumes bandwidth intended for work activities.
C. It is a form of software piracy.
D. Online gaming is illegal in most corporate settings under federal law.

A bank implements a 'Safeguards Rule' that requires a written information security plan. This is a specific requirement of which privacy law?

A. Children's Online Privacy Protection Act (COPPA)
B. Health Insurance Portability and Accountability Act (HIPAA)
C. Fair Credit Reporting Act (FCRA)
D. Gramm-Leach-Bliley Act (GLBA)
