

National University of Computer and Emerging Sciences, Lahore Campus

	Course Name:	Professional Practices	Course Code:	CS 4001
	Program:	BS (Computer Science)	Semester:	Spring 2026
	Instructor:	Shehryar Raza (VF)	Section	CS (6C)
	Exam Type:	Quiz 3 - Version A	Total Marks:	20

Student Name

Roll No.

Q1. Encircle the correct option from the given Questions:

[20 marks]

According to the U.S. Code of Federal Regulations (CFR), which specific characteristic distinguishes a 'professional' from other workers in a legal context?

- A. A commitment to public service that overrides the profit motive of their employer.
- B. Membership in a state-sanctioned licensing body that oversees ethical conduct.
- C. **The consistent exercise of discretion and independent judgment in their work.**
- D. The possession of a four-year degree from an accredited academic institution.

In the context of the IT industry, why is 'commoditization' described as an 'existential force' for domestic IT professionals?

- A. **It turns specialized services into standardized routines where price becomes the primary differentiator.**
- B. It prevents IT workers from accessing trade secrets, thereby limiting their career advancement.
- C. It forces companies to adopt open-source software, eliminating the need for systems analysts.
- D. It legally reclassifies software engineers as non-professionals under the U.S. Code of Federal Regulations.

Under Immanuel Kant's Deontological framework, why is the act of lying to a 'murderer at the door' considered unethical?

- A. Lying in that situation would result in a net decrease in aggregate happiness for the community.
- B. **The rule against lying must be universalizable without contradiction, regardless of the specific consequences.**
- C. The murderer's natural right to life is being violated by the deception.
- D. Emotions like fear or sympathy are the only reasons to lie, and Kant argues decisions must be grounded in reason.

How does 'Rule Utilitarianism' attempt to address the 'Organ Transplant Dilemma' that plagues 'Act Utilitarianism'?

- A. **By arguing that a society that allows the harvesting of organs would suffer a catastrophic loss of long-term utility due to fear.**
- B. By asserting that every individual has an inherent, natural right to their own body that cannot be overridden by numbers.
- C. By using a stricter calculus to prove that the loss of one life is mathematically equal to the gain of five lives.
- D. By shifting the moral responsibility from the individual surgeon to the medical organization.

Which of the following is a specific legal requirement for a piece of information to be classified as a 'trade secret'?

- A. The information must have been developed using government-funded research grants.
- B. The information must be known by a minimum of 10% of the competitors in the industry.

C. The information must be registered with the U.S. Patent and Trademark Office.

D. The owner must have taken active, reasonable steps to keep the information confidential.

In professional IT malpractice, how is the 'Reasonable Professional Standard' different from the 'Reasonable Person Standard' used in general negligence?

A. It only applies to IT professionals who hold a state-issued license to practice.

B. It protects IT workers from lawsuits unless they intended to cause harm to the client.

C. It evaluates actions based on the specialized knowledge and skills expected of a peer in the same profession.

D. It requires that the professional followed a government-mandated code of conduct to avoid liability.

Under the Foreign Corrupt Practices Act (FCPA), which of the following scenarios would most likely result in individual criminal liability for an IT executive?

A. Authorizing a payment to a foreign official to secure a multi-million dollar government contract.

B. Accepting an expensive gift from a supplier during a competitive bidding process.

C. Failing to disclose a minor security breach that affected only foreign users.

D. Using pirated software in a satellite office located in a country where piracy is legal.

What is the 'Critical Limit' of the 4th Amendment regarding the right to privacy in the digital age?

A. It only restrains the actions of the government and does not apply to private corporations like Google or Facebook.

B. It only protects physical property and does not extend to digital data stored in the cloud.

C. It becomes void once a user agrees to a company's Terms of Service and Privacy Policy.

D. It only applies to U.S. citizens and offers no protection for international data transfers.

The Fair Credit Reporting Act (FCRA) was primarily enacted to address which specific problem in the consumer data industry?

A. Banks and credit card companies selling customer purchase history to third-party marketers.

B. The inability of consumers to see or challenge inaccuracies in the reports held by credit bureaus.

C. The lack of free annual credit reports for all U.S. citizens regardless of their credit history.

D. The widespread theft of Social Security numbers from poorly secured government databases.

Why does the European Union (EU) frequently struggle with U.S. data transfers, specifically regarding the 'Safe Harbor' and 'Privacy Shield' frameworks?

A. The U.S. lacks a federal law requiring verifiable parental consent for children's data collection.

B. U.S. companies are prohibited by the FCRA from sharing any consumer data with foreign entities.

C. The EU mandates that all data transfers be encrypted using a specific government-approved algorithm.

D. The reach of the U.S. PATRIOT Act allows government surveillance that contradicts EU privacy standards.

In the context of identity theft, how does 'Spyware' differ significantly from 'Phishing' in its method of data collection?

A. Spyware only works when the user is offline, whereas phishing requires an active internet connection.

B. Spyware captures data through a technical install that monitors behavior, while phishing relies on social engineering to trick the user.

C. Spyware is legal when used by employers, whereas phishing is universally criminalized under federal law.

- D. Phishing is a form of 'data breach' where a company's database is hacked, while spyware targets individuals.

Which type of personalization software relies on matching patterns across different users, often summarized as 'People who bought X also bought Y'?

- A. Contextual Commerce
- B. Collaborative Filtering
- C. Rules-Based Personalization
- D. Demographic Filtering

What is the 'Golden Rule' mentioned for avoiding a phishing attack?

- A. Always use a debit card instead of a credit card for online purchases to limit fraud liability.
- B. Never click links in unexpected messages; always navigate to the website yourself by typing the URL.
- C. Only enter your Social Security number on websites that use a '.gov' or '.org' domain extension.
- D. Ensure your antivirus software is updated before opening any email attachments from unknown senders.

In a workplace setting, why do government (public sector) employees typically enjoy stronger privacy protections than private sector employees?

- A. Because government laptops are prohibited from using keystroke-logging or GPS tracking software.
- B. Because public sector employees are legally defined as 'professionals' while most private IT workers are not.
- C. Because the Sarbanes-Oxley Act (SOX) mandates strict privacy controls for all government IT systems.
- D. Because the 4th Amendment applies specifically to state actors, requiring reasonable suspicion for many searches.

What unique privacy risk is associated with GPS data, even if it is collected anonymously?

- A. Location history can reveal sensitive inferences like religious affiliation, health status, or personal relationships.
- B. Anonymous GPS data can be used by hackers to remotely disable a vehicle's braking system.
- C. GPS chips emit a signal that can be captured by 'shoulder surfers' to steal PIN numbers.
- D. The U.S. PATRIOT Act requires all GPS data to be stored on government-accessible servers for 10 years.

Which landmark privacy law entitles U.S. consumers to one free credit report per year from each of the three major bureaus?

- A. GLBA (Gramm-Leach-Bliley Act)
- B. FCRA (Fair Credit Reporting Act)
- C. RFP (Right to Financial Privacy Act)
- D. FACTA (Fair and Accurate Credit Transactions Act)

What is the primary purpose of the 'False Claims Act' in the context of IT ethical relationships?

- A. It allows private citizens to sue on behalf of the government for fraud and share in the recovered funds.
- B. It mandates that all trade secrets be registered with the government to prevent 'False Claims' of ownership.
- C. It criminalizes 'Résumé Inflation' and allows companies to sue employees for fabricated credentials.
- D. It protects IT suppliers from being sued by clients who fail to meet their contractual obligations.

In ethical reasoning, how does the distinction between 'Harm' and 'Wrong' apply to a developer secretly collecting user data?

- A. The action may be 'wrong' because it violates autonomy and trust, even if no obvious 'harm' has occurred yet.
- B. If the user is never aware of the collection, no 'wrong' has been committed according to Utilitarianism.
- C. The action is only 'wrong' if the developer intends to sell the data to a third party.
- D. The collection is only a 'wrong' if it results in a data breach that causes financial 'harm'.

Which ethical framework argues that humans have intrinsic worth and must be treated as 'ends in themselves' rather than merely as resources?

- A. Organizational Ethics
- B. Utilitarianism
- C. Contextual Commerce
- D. Deontology

In the context of 'Contextual Commerce', why is it often considered less invasive than other forms of profiling?

- A. It uses advanced encryption that makes it impossible for the company to see what page the user is on.
- B. It is only used by government agencies and is prohibited for use by private marketing firms.
- C. It relies solely on the content currently being viewed and does not require a user's browsing history or cookies.
- D. It requires the user to 'opt-in' via a pop-up window before any ads are displayed.
