

Quiz # 3

8.5

Q Hybrid warfare - Discuss & elaborate how & why hybrid warfare shapes modern security threats -

How

Hybrid warfare uses non-military tools like cyberattacks, political manipulation, propaganda and economic pressure.

Why

Countries struggle to identify when an attack is occurring or who is responsible. International law become difficult to apply. Response becomes slow and ineffective because attacks are not obvious acts of war.

Outcome

Hybrid warfare mixes conventional force, cyber warfare, misinformation campaigns, economic coercion and diplomatic pressure.

These methods create multi-layered crises where government must defend territorial borders, networks and sensitive data, public opinion and media, political institutions of the state and financial systems.

How it achieves its purpose:-

National security becomes inseparable from civilian security. Civilian panic or misinformation can achieve political outcomes without firing a shot. Societies become vulnerable to influence operations and technological disruptions.
